

FINAL CASE SUMMARY

Cases Counted: July - September 2003

Washington State (excluding King County)

n = 29 cases

OUTCOME MEASURES	Smear -				Total
	Smear + (n = 14)	Culture + (n = 6)	Pediatric ¹ (n = 0)	Other ² (n = 9)	
Index of Completion as of July 2004	57%	50%	-	44%	52%
Including cases likely to complete	92%	100%	-	100%	96%
Excluding MDR resistant cases	92%	100%	-	100%	96%
DOT usage as of July 2004	100%	67%	-	100%	95%
Died + Reported at Death	14%	0%	-	11%	10%
Lost to Follow-up ³	0%	0%	-	0%	0%
Refused to Continue Treatment	0%	0%	-	11%	3%
Treatment Not Completed w/in 12 mos ⁴	0%	0%	-	0%	0%
HIV Non-Screening ⁵	0%	33%	-	22%	14%
Medical Interruptions	0%	17%	-	11%	7%
<u>Timeliness: Lab Sputum Collection</u>	-	-	-	-	-
(Mean Days)	1.50	15.00	-	9.00	2.92
(Range)	7	7	-	50	50
<u>Timeliness: Meds Starting⁶ (n=6)</u>	-	-	-	-	-
Smear +:	-	-	-	-	-
(Mean Days)	0.83	-	-	-	-
(Range)	5	-	-	-	-
<u>Cavitary CXR:</u>	-	-	-	-	-
(Mean Days)	15.60	-	-	-	-
(Range)	51	-	-	-	-
<u>Timeliness Reporting: LHJ-DOH</u>	-	-	-	-	-
(Mean Days)	2.20	-	-	-	-
(Range)	14	-	-	-	-
<u>Timeliness Reporting: HCP-LHJ (n=6)</u>	-	-	-	-	-
Smear +:	-	-	-	-	-
(Mean Days)	1.00	-	-	-	-
(Range)	7	-	-	-	-
<u>Cavitary CXR:</u>	-	-	-	-	-
(Mean Days)	8.60	-	-	-	-
(Range)	29	-	-	-	-
<u>Timeliness Reporting: Lab-LHJ</u>	-	-	-	-	-
(Mean Days)	2.70	-	-	-	-
(Range)	8	-	-	-	-
<u>Timeliness: Susceptibility</u>	-	-	-	-	-
(Mean Days)	18.90	20.10	-	22.00	20.33
(Range)	39	37	-	18	39

¹ Note: Pediatric cases are those cases that are < 15 years of age and extra-pulmonary

² Note: Other cases are extra-pulmonary cases and those that do not fall under any other qualifying categories (ie: clinical confirmation or provider diagnosis and cases that transferred into the state)

³ Note: Percentage lost while on medication

⁴ Note: Non-MDR resistant cases that will not be able to complete treatment w/in 12 months

⁵ Note: Those cases that were NOT offered an HIV test at time of TB screening

⁶ Note: Data for timeliness of meds starting and timeliness of HCP-LHJ

includes only data on cases that are both smear positive and have a cavitary chest x-ray.
